

The Children's Workshop

Parent Communication App

We have an extraordinary Parent Communication App that our teachers use daily to relay information and send pictures to family members, send newsletters, and track developmental progress for each child's portfolio!

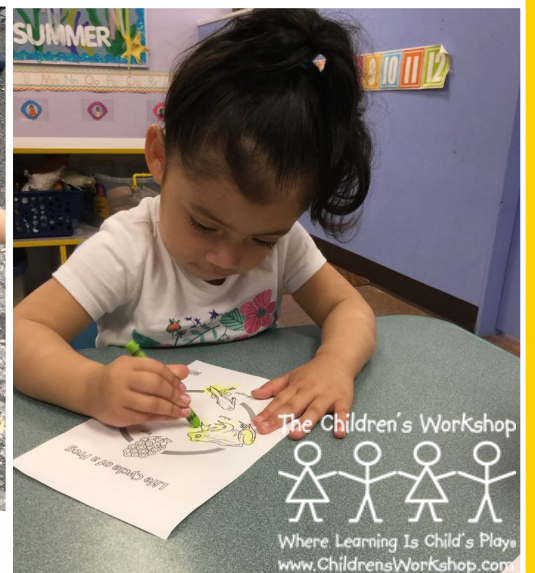

With this technology, parents/guardians are able to opt into email or text alerts and they can receive all information, instantaneously, about their child and their child's school day. Teachers and staff can tag daily pictures with our Developmental Domains (Social/Emotional, Physical, Artistic, Cognitive, and Language/Literacy) and are then able to communicate with the parents/guardians by adding captions or sending quick little notes. Families LOVE this feature and we're utilizing it more and more each day!

We are so excited to be able to communicate with our families throughout the day and to showcase all of the great things the children learn in class!

For more information about our Parent Communication Platform, please contact the Director of your local TCW!

Don't miss a minute of your child's day with TCW!
